Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
6. Claims 1-3, 15, 17-21, 55-75 and 78-86 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berstis et al. (US Patent No. 6282653) ("Berstis") and further in view of Satoh et al. (US Patent No. 6327600) ("Satoh").

7. Berstis discloses a computer-implemented method for user access to document content using a logic client device comprising:
 8. delivering to a user of said client logic device, via a document server, a first user viewable version of the actual contents of a specific document residing at a said document server on a first cost basis, said first user viewable version being protected by a security server to prevent the user from performing a standard operation on said version, said standard operation consisting of any of copying, printing or saving (*Berstis, at least Abstract, C 2 L 35 – C 4 L 8, C 5 L 32 – C 10 L 18*);
 9. delivering user-requested pages of a specific document from a document server in a first user-viewable version comprising a form protected by a security server to a user of a client logic device to permit said user viewing the actual contents of said pages of said specific document and selecting by said user but not printing, copying or saving by the user (*Berstis, at least Abstract, C 2 L 35 – C 4 L 8, C 5 L 32 – C 10 L 18*);
 10. Berstis does not expressly disclose the following aspects:
 11. calculating with said document server a charge to permit the user to perform a requested standard operation on a user-selected portion of said specific document on a second cost basis; and
 12. delivering to said user, via said document server, a second version of the actual contents of said specific document residing at said document server comprising said user-selected portion of said specific document, wherein a user requested standard operation is completed, in coordination with said document server, upon payment of the calculated charge.
 13. Satoh, however, teaches:

14. calculating with said document server a charge to permit the user to perform a requested standard operation on a user-selected portion of said specific document on a second cost basis (*Satoh, at least Abstract, C 8 L 35-50; C 9 L 4-10; C 10 L 33 – C 12 L 31*); and
15. delivering to said user, via said document server, a second version of the actual contents of said specific document residing at said document server comprising said user-selected portion of said specific document, wherein a user requested standard operation is completed, in coordination with said document server, upon payment of the calculated charge (*Satoh, at least Abstract, C 8 L 35-50; C 9 L 4-10; C 10 L 33 – C 12 L 31*).
16. It would have been obvious and motivated for an ordinary skill in the art at the time the invention was made to add to the system of Berstis the following aspects:
17. calculating with said document server a charge to permit the user to perform a requested standard operation on a user-selected portion of said specific document on a second cost basis; and
18. delivering to said user, via said document server, a second version of the actual contents of said specific document residing at said document server comprising said user-selected portion of said specific document, wherein a user requested standard operation is completed, in coordination with said document server, upon payment of the calculated charge;
19. as taught in the system of Satoh, to charge a user for a requested copy-allowed part of a document onto a document that is presently producing [rendering] as well as copy the requested copy-allowed part onto the document that is presently producing [rendering]. (*Satoh, C 12 L 13-15*)

20. As the claimed invention is merely a combination of old elements, and in the combination, each element merely would have performed the same function as it did separately, so, one of ordinary skill in the art would have recognized that the results of the combination were predictable.

Response to Arguments

21. Applicant's argument with respect to 103(a) rejection of claims 1 and 67 under Daniele has been considered but is moot in view of the new ground of rejection as discussed above.

Conclusion

The prior art made of record which is considered pertinent to Applicants' disclosure is listed on the document titled 'Notice of References Cited' ("PTO-892"). Unless expressly noted otherwise by the Examiner, all documents listed on the PTO-892 are cited in their entirety.

Applicant is reminded of his or her duty to disclose information material to patentability (37 CFR 1.56).
